ROHIT CHOWDHURY

Full-Stack Developer
+91 7979878454 | Email | LinkedIn | GitHub | Portfolio

Summary

Computer Science student building full-stack (MERN) applications with real-time features and AI agents using LangGraph, LangChain and RAG. Built a ride-booking platform using Redis, Kafka and Nginx, and an AI email agent with human-in-the-loop approval.

Education

Haldia Institute of Technology, Kolkata
Bachelor's Degree in Computer Science 2024 – 2028
CGPA: 8.09/10

Technical Skills

- **Programming:** Python, JavaScript, C++, SQL
- **Frontend:** React.js, HTML, CSS, Streamlit
- **Backend:** Node.js, Express.js, FastAPI, GraphQL, REST APIs, Socket.IO
- **Database:** MongoDB, MySQL, Redis
- **AI:** LLMs, RAG, LangChain, LangGraph, AI Agents, Tool Calling
- **Tools & Concepts:** Git, GitHub, Apache Kafka, Nginx, Microservices, Caching, Load Balancing

Projects

Saarthi – Ride Booking Platform: GitHub | Live Demo
MERN Stack, Socket.IO, Redis, Apache Kafka, Nginx, Microservices

- Built a ride-booking platform with fare estimation, live ride tracking, OTP trip verification and a captain dashboard.
- Added real-time notifications and location updates with Socket.IO; cached frequently accessed data in Redis.
- Streamed captain locations through Kafka and batch-inserted them into the database to reduce write load.
- Designed microservices behind an API Gateway, with Nginx load balancing across gateway instances.

MailMind – AI-Powered Email Agent: GitHub | Live Demo
Python, FastAPI, LangGraph, LangChain, React

- Built an AI email assistant that summarizes long emails, filters spam, drafts context-aware replies and schedules meetings.
- Designed LangGraph agent workflows with human-in-the-loop approval before any email is sent or event is created.
- Integrated Gmail and Google Calendar APIs with a FastAPI backend and a React frontend.

Achievements

- Solved 450+ Data Structures and Algorithms problems and earned the 365-day badge on LeetCode
- Technical Member of Data Science Club.
